

I live in a place where there are no good radio stations. I drive down the road and constantly switch channels until I hear a song I like in the least bit. When I got satellite radio, I was in my glory. I will never go back to the radio, at least in my home town. I listen to XM radio every day. I pay for this service and should be able to hear what I want including the local and national news. I strongly urge you to reject the NAB's petition 04-160. This is what we the people want and you should support us. So, once again, reject the bill HR 4026 and let americans choose what we want to listen to and where we want to listen to it. Thank-you.
